PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience developing scalable web applications and contributing to a production-grade e-commerce platform. Proficient in building secure MERN stack applications using RESTful APIs, authentication and authorization, and AWS cloud services.

WORK EXPERIENCE

Web Development Intern | Omnexia Technology (Remote) | [Certificate](#) *Apr 2026 – Jul 2026*

- Developed the complete frontend for the Delivery Partner application, building 15+ reusable components across 8 responsive pages using React.js and Tailwind CSS.
- Delivered 2 production features, including Filter Sidebar and Order Cancellation workflow.
- Optimized 15+ UI components, resolved responsive issues across desktop and mobile devices and ensured cross-browser compatibility.
- Collaborated with a team of 4 developers using Git and GitHub to deliver production features.

PROJECTS

[GitForge](#) – GitHub-Inspired Repository Management Platform | [Client](#) | [Server](#) *Jan 2026 – Feb 2026*

- Engineered a GitHub-inspired repository platform with JWT authentication, RBAC, and repository visibility.
- Constructed a hierarchical file system supporting nested folders, uploads, editing, deletion, and cloud storage.
- Leveraged Monaco Editor for syntax-highlighted in-browser code editing and persistent file saving.
- Architected a repository browser supporting 5+ file formats, issue management and Markdown rendering.

[CivicPulse](#) – AI-Triaged Civic Issue Reporting Platform | [GitHub](#) *Sept 2026*

- Built a 3-tier MERN app that auto-classifies civic issues and computes priority scores in real time.
- Designed 5 REST API endpoints handling issue creation, AI-triage, status updates, and resolution verification.
- Developed 2 role-based dashboards (citizen + authority) using React for reporting and queue management.
- Architected a modular scoring engine decoupled from the UI, enabling future ML upgrades with no frontend changes.
